# Powerfriction®

**Stellana**

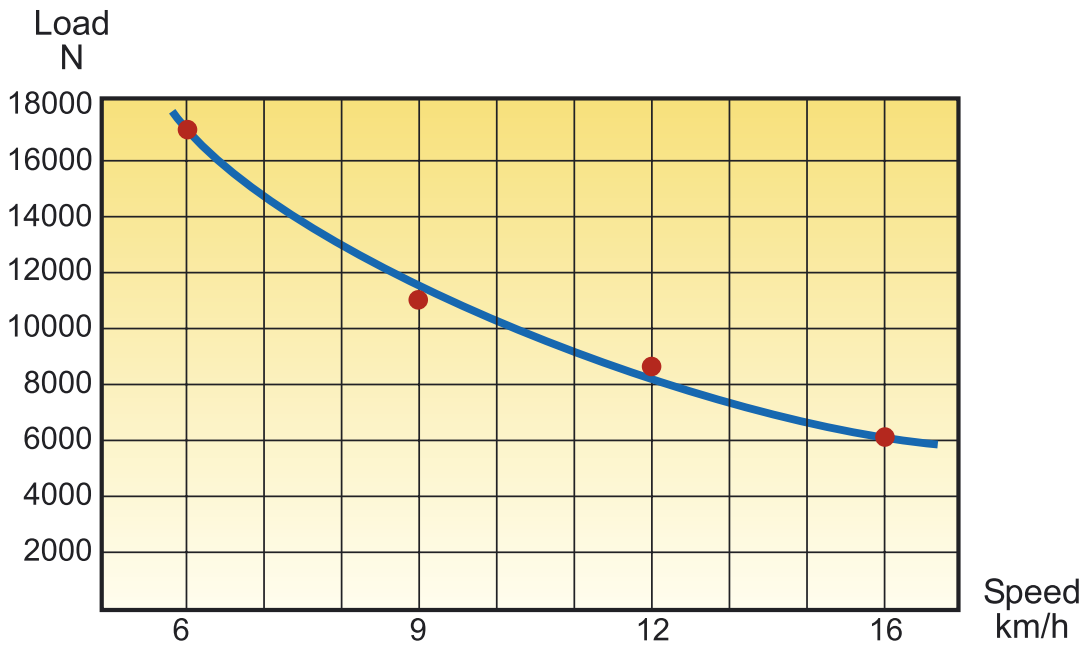

HEXAGON POLYMERS

## Powerthane®

Powerthane is the registered trademark of a new material in Stellana's range of wheels. Testing of the Powerthane wheels has been carried out in our test machine and on electric trucks in field tests.

Powerthane is a cast polyurethane with high load capacity – at a competitive price. Powerthane is non-marking.

### Excellent load capacity. Wheel 215 x 70

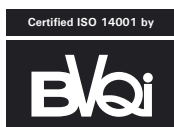

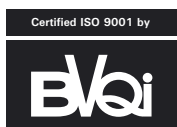

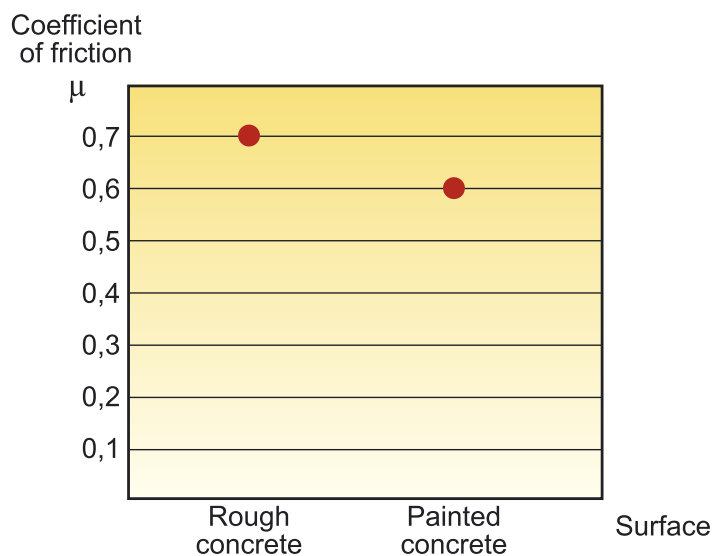

## Powerfriction®

Powerfriction is another new material from Stellana for applications where high friction is required.

Powerfriction has a high comfort and a much higher load capacity compared to rubber wheels. Powerfriction is non-marking.

Stellana offers Powerthane wheels and Powerfriction wheels in quite a number of dimensions, from the smallest rollers to drive wheels.

### Powerfriction – when high friction is required. Wheel 215 x 70
